## About me

I am a dedicated React developer with 3 years of experience in building dynamic and responsive web applications. I have a strong passion for creating seamless user experiences and writing clean, maintainable code. My expertise includes working with React, JavaScript, HTML, CSS, and various frontend libraries and tools.

## Work experience

### Front-End (Web3) Developer

Since December 2021 Web3HQ Remote

- Developed high-performance web applications using Next.js, React, Angular and TypeScript.
- Utilized CSS styles with preprocessors like Sass and styled-components to create aesthetically pleasing user interfaces.
- Created a chat system facilitating real-time communication among users via socket-based data transmission.
- Worked with smart contracts for data interaction, handling reads and writes on blockchain networks.
- Developed graphical representations illustrating connections and transactions between wallets in blockchain systems.
- Working closely with designers to translate Figma layouts into functional web pages.
- Supporting and maintaining developed applications, including bug fixes, feature updates, and code optimization.

### React Developer

From September 2021 to December 2021 IT-Academy Remote

Together with an outstanding team of developers, we built a special dashboard for students that allows them to easily fill out forms and create impressive resumes, all powered by React.

### Teacher of programming

From October 2019 to December 2021 Hello World Online

I conducted online sessions worldwide for children aged 5 to 18, covering various subjects including JavaScript, HTML, CSS, Figma, and Scretch.

## Education

### BELARUSIAN STATE UNIVERSITY OF INFORMATICS AND RADIOELECTRONICS

From September 2017 to June 2021 University Minsk

Bachelor's degree in Computer Science

### Front-End Course

From January 2021 to September 2021 Rolling Scopes Online
